

The **SMV40C30GB**'s VarioPerfect options let you customise each wash cycle to suit your load. Choose the Eco50 program to save energy or the VarioSpeed to get powerful cleaning in half the time.

#### **VarioBasket**

There's plenty of space for all your pots, pans, plates and glasses – no matter what their size or shape. The dishwasher's two foldable racks in the top and bottom baskets provide effective space to accommodate. There's room for 12 place settings too – ideal for a quick clean up after dinner.

#### **Active Water**

Get the maximum use out of every drop of water, thanks to Bosch's innovative ActiveWater technology. With faster heating times, targeted water circulation and improved pump performance, the **SMV40C30GB** ensures no water is wasted. Plus, combined with its A+ energy rating, you can cut down on those energy bills too.

#### **Dosage Assist**

Make sure your dishwasher gets the most out of its detergent – thanks to the **SMV40C30GB**'s Dosage Assist feature you can ensure its performance is maximised. By catching the tablet once it's dropped into the cycle, Dosage Assist makes sure it's effectively dissolved, giving you great results every time.

#### **Eco Silence Drive**

The **SMV40C30GB** uses magnets instead of brushes to rotate around the motor, making the dishwasher run extra quietly. Run a cycle overnight or during your favourite TV show and you won't be disturbed.

#### **Safety lock**

For extra peace of mind the **SMV40C30GB** features a safety lock to prevent the doors from accidentally being opened – ideal for families with young children.

The dishwasher's new TimeLight also indicates the program status and time remaining – so you'll never disrupt a cycle again.

Engineered with intelligent storage and wash features, the Bosch **SMV40C30GB Full-size Integrated Dishwasher** gives you powerful, energy efficient cleaning day after day.
