

Top features:

- Set & Go function lets you pre-program your ovens cooking time
- Get your food defrosted just right with the dedicated defrost function
- EasyClean enamel makes spring cleaning that little bit easier

Set & Go function

Cook 'til your hearts content with the Zanussi **ZZB35901XA Electric Oven**. With a Set & Go function, you'll be able to pre-program your ovens cooking time. It's ideal if you need to do some other things round the house and don't want the hassle of going back and forth at the oven. Simply set your dish to cook for its required time and it'll turn off once it's done.

Get your food defrosted just right

Featuring a dedicated defrost function, you won't have to worry about guessing if your meat has thawed or not. Just turn the knob and let the oven defrost it correctly before roasting your joint of meat.

EasyClean enamel

Spring cleaning can always be a pain but with EasyClean enamel, cleaning your oven has gotten even easier! The enamel will help keep away any burnt bits and grease so you can just wipe it away with a damp cloth and get it looking nice and clean.

The lining is also smudge and fingerprint free to help maintain its wonderful shine and looking brand new no matter how much you've been baking!
