

- Frameless design makes cleaning a breeze

Quick-therm hobs

Make fast and delicious snacks or get dinner going quickly with Bosch's Quick-therm technology.

Each cooking zone reaches your desired heat in a flash, so they're ready to go as soon as you've prepared your ingredients.

Heat beans up for a tasty treat on toast, or sear a steak to perfection; for delicious meals when you want them.

Variable power settings

All four cooking zones feature nine power settings, so you can tailor the heat to suit what you're cooking.

Turn one zone down to its lowest setting to keep your potatoes warm, while you crank up another to finish off the gravy.

The easy to use dials are mounted on the right of the hob, too, so they aren't accidentally knocked when you lean over to tend to your cooking.

Residual heat indicators

Once you've finished using your Bosch **Serie 2 PKE611CA1E Electric Ceramic Hob**, residual heat indicators will remind you that the surface is still hot.

This smart safety feature helps to prevent accidental burns, and gives you peace of mind that when the indicators go out the surface is safe to touch again.

Frameless design

The ultra-modern frameless glass finish of this hob makes cleaning quick and simple.

The flat surface means that you can simply wipe over it with a damp cloth to remove marks and spills, keeping your kitchen looking clean and tidy - even after mealtimes.
